

TaiRox™ is Fast!

Turn Sage 300 Hours into Minutes

Fast Clear History: a SQL Server specific utility that performs Sage 300 clear history operations in a fraction of the time taken using the Sage 300 functions.

"Fast ... cleared 49 million records in about 75 minutes ... before this ... not even an option! Thanks TaiRox!!" **Kelly Hummel, Net@Work.**

"Database is 187 GB ... standard OE clear ... [2 or 3 days] ... TaiRox OE clear ... [less than 2 hours]" **Scott Davies, Equation Technologies.**

Fast Data Integrity: check integrity 100x-1000x faster on very large databases. Schedule integrity checks nightly.

"The native data integrity ... took over 3 days ... Fast Data Integrity ... less than 1.5 hours." **Bruce Bruce Warrell, NextLevel Information Solutions.**

"**Subject:** Re: Fast Data Integrity ... Darn that thing is fast !!!!!"
Paul Field, Net@Work.

Fast DBTools: operate many times faster than standard utilities. **Plus:** time-saving tools not otherwise available.

"As if you need further testimonials ... Load complete in 1:20 ... a 40 GB database, had taken 4.5 hours" **Scott A. Schreiner, Axis Integrated Solutions.**

"the little touches ... are so valuable ... a database dump ... nicely warns the user when there are SQL views in the database" **Mark Binkley, DataQuest, Inc.**
