

TaiRox Productivity Tools Demonstration Guide

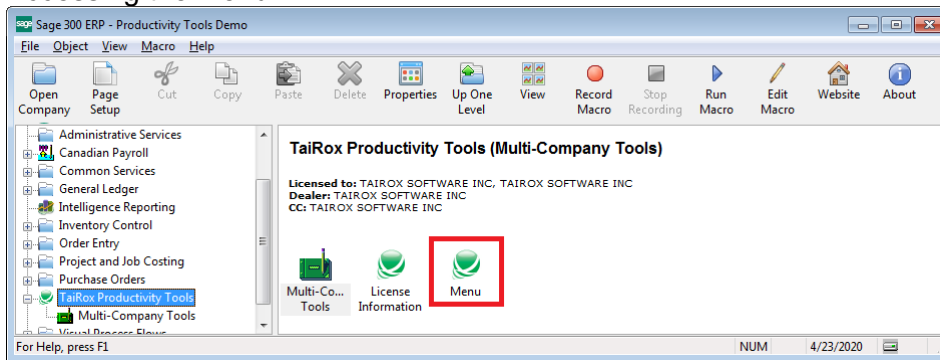

Hiding Functionality - The Menu Program

A TaiRox Productivity Tools activation code (all modules) provides access to dozens of tools, which can be overwhelming. The Menu program provides a way to hide functionality that will not be relevant to a client or prospect.

Single module activations are available. Using the Menu program allows a reseller to demonstrate limited or full functionality quickly, without changing activations. Some customers may also wish to hide tools not being used.

Important Notes: The Menu program is only available to the Sage 300 ADMIN user. Changes are site-wide, meaning that they apply to all Sage 300 companies, even though the edits are done while logged into a single company's desktop. Demonstration data in DBDump format is available from the products page of the TaiRox website.

Accessing the Menu:

All tools will be shown, irrespective of the activation code in use. Deselect to hide tools and then re-open the Sage 300 company to have the new settings take effect:
