# SOX Second Sight for Sage 300

Available for $1,195 + $300 per year, SOX Second Sight provides a way to ensure that the Sage 300 user posting a General Ledger, Accounts Payable or Accounts Receivable batch has not been involved in the preparation of that batch. While Sage 300 separates the data entry and posting permissions, it may be that all users can perform both functions and a requirement exists to ensure that two different users see the processing of each batch.

Watch: https://vimeo.com/774375832

Standard Sage 300 Security ensures that non-administrators need specific security rights to turn the functionality on and off.
